- AMs will receive a list of claims to verify from their assigned PC. There will be strict timeframes and tracking to monitor which user did what, when. [f75b32c](#) [C](#)
- Approvals controller - will ensure AMs approve verified claims from their respective PCs [108b176](#) [C](#)
- PCs will view a table of claims submitted by assigned ICs. They will have to check the submitted URLs of class registers correspond with hours submitted on the claims. In the case they don't, a message will be displayed. [c3d4f12](#) [C](#)
- Approval controller - will enable PCs to verify or deny claims. Verified claims are submitted to the AM for Approval. In the case of denied claims, the PCs must choose an option from a drop down list. [108b32c](#) [C](#)
- This will be a tabular view of submitted claims in the IC view, from here they should edit claims if necessary. [a4f9c5d](#) [C](#)
- ICs will submit claims for hours worked. Majority of the fields will be drop down lists to limit human error [814f112](#) [C](#)
- Claim Controller - this controller will update claim related input [8b8a112](#) [C](#)
- EditPersonalDetails: This form will allow users to view, edit and update existing data. [8b8b112](#) [C](#)
- Users should be able to access CMCS via the login form [f4b4a12](#) [C](#)
- register form to verify user details and role [f7b4a12](#) [C](#)
- This Home Controller will manage user input from the Login and Register form [f7b4a12](#) [C](#)
- Everything [f7b4a12](#) [C](#)

Commits on Sep 8, 2024

- Add project files. [f7b4a12](#) [C](#)
- Add gitattributes and gitignore. [f7b4a12](#) [C](#)
